

## COVID-19 MANUAL UPDATES

As we move towards government approved reopening, and gradual business resumption across Canada, franchisors need to be aware of the strict public health measures put in place for the reopening of businesses.

Franchisors need a plan for this resumption, and tools and protocols in place to protect their staff, customers, and the future of their business. Every province has a slightly different approach to what type of business can open (and when), and how these businesses must conduct their interactions with the public at large.

NFI can provide you with the government approved direction, as we have sourced the different guidelines and directives to keep you up to date. Plus, we know how to present this information in easy to understand formats that are fully accessible to your staff members on paper, online or on their preferred mobile device.

All Training and Operations manuals will need to be updated to reflect the new COVID-19 realities. We can provide custom content tailored to get your franchise up to date with accepted COVID-19 protocols.

## COVID-19 SIGNAGE and SAFEGUARDS

Franchisees are asking for directives on what they need to prepare for post COVID-19 safe environments. We have all the COVID-19 signage, branded floor distancing stickers, and other staff and frontline worker safety products ready to be distributed to your franchise system. We can also supply you with sources for private label suppliers of hand sanitizer, with compliments of your brand on the label.

Contact **Network Franchising International** for more information on these services.
